What is the Study of Communication?
The study of Communication explores how people use messages to generate meanings within and across various contexts, cultures, and channels. The field promotes the effective and ethical practice of human interaction. Communication students are usually those who are creative, intelligent, and highly motivated. Communication majors receive the preparation and hands-on training required for lifelong careers in one of hundreds of desirable jobs that shape the nation’s culture. There are two Communication degree options at DSU:

Communication Studies:
Human communication studies traditional face-to-face interactions between people, among groups, and in public speaking settings. The human communication emphasis allows students to master multiple facets of human communication such as: organizational communication, interpersonal communication, and public communication. This emphasis educates students in research methods and provides opportunities for students to conduct their own research.

Organization & Leadership:
The organization and leadership degree is a cohort program for working professionals. The Organization and Leadership emphasis is specifically designed to provide an evening curriculum in a concentrated linear format. Due to the unique nature of the organization and leadership program, students are encouraged to contact the current advisor for further information.
