Program Description

Dixie State University offers a course of study leading to a Bachelor of Science in Medical Laboratory Science degree. During the first two years or pre-professional phase of study a student completes a minimum of 58 semester hours of coursework. The coursework includes but is not limited to: a) general education courses, including a statistic course; b) biology requisites that must include a course in microbiology and courses in human anatomy and physiology; and c) cognates in chemistry. After completion of the pre-professional phase of study and, through a competitive application process, a student may be selected to enter the final two years of study or the MLS professional program. Admission selection decisions are made without regard to race, ethnicity, color, national origin, age, status as a person with a disability, religion, sexual orientation, gender identity/expression, and protected veteran’s status.

The MLS professional program is admission-limited meaning that, through a competitive application process, one cohort of no more than 12 students is admitted to the professional program per year. The start date for the program is the first day of classes of the DSU fall semester. Admitted students spend three semesters completing MLS-specific courses on the DSU campus. Upon successful completion of these courses, students are then assigned to one or more program-affiliated medical laboratories to complete a semester-long clinical internship. During this internship, students spend 40-hours per week advancing their knowledge and skills performing a wide variety of medical lab tests in a contemporary accredited medical laboratory under the supervision of professionally credentialed Medical Laboratory Scientists. Graduates are eligible to take the Medical Laboratory Scientist (MLS) national certification examination offered by the American Society for Clinical Pathology (ASCP).

Our vision is that the Dixie State University Medical Laboratory Science Program be a model of excellence in medical laboratory science education, graduating MLS who meet the workforce demands of today and tomorrow.

The mission of the Dixie State University Medical Laboratory Science Program is to graduate professionally accomplished MLS scholars, committed to life-long learning and prepared to meet current and future workforce needs in medical laboratory science.

The goals of the DSU MLS program are to:

1. Provide a curriculum that meets current and emergent pedagogical and professional development needs of students.
2. Establish and sustain partnerships with local and regional community medical laboratories that provide exceptional learning experiences for our MLS students.
3. Innovate learning experiences and provide opportunities that maximize every program student’s potential to achieve MLS career entry-level competencies.
4. Graduate knowledgeable and skilled Medical Laboratory Scientists who meet the workforce needs of our local community, Utah, and the under-served regions of the country.
5. Help advance MLS pedagogy and growth of the MLS profession.

Essential Requirements

The DSU MLS program has established non-academic standards of performance defined as essential requirements. Through their professional conduct, program students represent Dixie State University and more importantly the MLS profession and the MLS Program. Accordingly, DSU MLS program students must possess knowledge, skills, attitudes to work in a wide-ranging variety of settings where laboratory testing is performed. Consequently, to be admitted and maintain enrollment, participate in, and successfully complete the MLS program, a student must meet the program's essential requirements. They are as follows:
Expectations of Mastery and Skill in Information Acquisition and Communication

A MLS professional program student must demonstrate the ability to acquire and to effectively communicate information in written and in spoken English. Specifically, a MLS program student must be able to:

1. Read for comprehension and follow verbal and written instructions, and thus demonstrate mastery of MLS coursework content at a level expected of a career-entry MLS.
2. Competently utilize technology to research, investigate, acquire and present information obtained by observation and experimentation.
3. Use strategies that minimize miscommunication.
4. At all times and in all circumstances, follow established procedures to safeguard protected patient information communicated by non-electronic and electronic means.

Expectations of Motor and Sensory Functions

A MLS professional program student must demonstrate sufficient motor and sensory function to execute movements required to carry out work assignments in the preanalytical, analytical, and postanalytical phases of laboratory testing. Specifically, a MLS program student must be able to:

1. Distinguish the physical attributes, including color, shape, and size, of objects both macroscopically and microscopically.
2. Demonstrate sufficient dexterity to manipulate specimens, laboratory tools, equipment and instrumentation including but not limited to computer touch-screens, keyboards and handheld calculators, necessary to obtain and to report test results by non-electronic and electronic means.
3. Show adequate mobility to attend to duties in the various locations of the medical laboratory work environment.
4. Use sensory skills to acquire and apply information presented by various means and media, including but not limited to tactile, visual and non-visual.
5. Perform sustained, often repetitive physical activity that may require sitting, standing and/or walking for prolonged periods of time.
6. Accurately read and record numbers, letters and symbols displayed in print whether transmitted through non-electronic, electronic or other technological media.
7. Demonstrate proficiency performing a wide range of tests in areas of the contemporary medical laboratory including but not limited to hematology, clinical chemistry, immunohematology, microbiology, molecular and emerging diagnostics.

Expectations of Professionalism

A MLS professional program student must be able to demonstrate an image of professionalism through behavior, speech, and grooming. Specifically, a program student must be able to:

1. Always adhere to medical laboratory safety protocols when working with various sample types including blood, urine, and other body fluids and tissues, with infectious organisms, and with hazardous chemicals.
2. Demonstrate the ability to work with focused attention on safety and accuracy whatever the work environment circumstances, and to objectively evaluate information and take responsibility for subsequent decisions when mistakes may have a high impact on patient care.
3. Adapt to changing work environments, maintain a professional demeanor, and remain focused despite distracting situations.
4. Demonstrate attributes that include integrity, responsibility, and tolerance.
5. Speak, act and perform all work in an ethical manner.
6. Show respect for self and others.
7. Work independently as well as actively engage cooperatively with others, performing professional obligations in a timely, responsible manner.
8. Prioritize tasks and accept responsibility for work performed independently and as a team member.
9. Assess his or her work performance, willingly accept constructive criticism, and look for ways to improve both knowledge and skill.

Accreditation

The Medical Laboratory Science program is accredited by the National Accrediting Agency for Clinical Laboratory Science (NAACLS). NAACLS can be contacted at:

NAACLS
5600 North River Road, Suite 720
Rosemont, IL 60018
Phone: 773-714-8880
www.naacls.org (http://www.naacls.org)

Facilities

The Dixie State University MLS program office and classroom laboratories are located on the second floor of the Russell C. Taylor Health Science Building, located at 1526 South Medical Center Drive, St. George, UT 84790.
Clubs
Admitted program students may choose to join a number of professional societies including the American Society for Clinical Laboratory Science (ASCLS) and the American Society for Clinical Pathology (ASCP).

Course Prefixes

Degrees and Certificates
• Bachelor of Science in Medical Laboratory Science (catalog.dixie.edu/programs/medicallaboratoryscience/bachelor_of_science_in_medical_laboratory_science)
• Phlebotomy Certificate (catalog.dixie.edu/programs/medicallaboratoryscience/phlebotomy-certificate)

Program Admission
“Our vision is that the Dixie State University Medical Laboratory Science Program be a model of excellence in medical laboratory science education, graduating medical laboratory scientists who meet the workforce demands of today and tomorrow.”

https://health.dixie.edu/mls/program-admissions/

*To be admitted* to the MLS Professional Program, a student must, at a minimum:

1. be admitted to DSU as a degree-seeking student and have completed a minimum of 58 semester credits
2. have a cumulative GPA of 2.50
3. have a GPA of 2.00 for all math and science courses
4. complete all **MLS professional program prerequisites** BEFORE the fall term start date. The prerequisites are as follows:

   - Completed DSU general education requirements; **NOTE: A previously earned degree may fulfill the DSU general education requirements, but per Utah Board of Regents policy, courses must be equivalent to DSU’s minimum General Education standards in English, Mathematics, and American Institutions.**
   - Completed two college-level math classes one of which must be statistics;
   - Completed 16-semester credits (or 24-quarter credits) in college-level Biology classes which must include at a minimum: 1) a microbiology course; the microbiology course must include a laboratory component either integral to the course or taken separately; and 2) a human anatomy and/or physiology course; the course(s) must include a laboratory component either integral to the course(s) or taken separately; and,
   - Completed a minimum of 10-semester credits (or 15-quarter credits) in college-level Chemistry classes which must include one course in organic or biochemistry with a lab component either integral to the course or taken separately.

**NOTE:** Program prerequisites do not have to be completed to APPLY to the MLS professional program.
Program Learning Outcomes*

Upon completion of the DSU MLS program, graduates will with:

1. **TECHNICAL SKILL**: Competently perform a full range of testing encompassing the pre-analytical, analytical, and post-analytical components of contemporary laboratory services in areas that include clinical chemistry, hematology/hemostasis, immunology, immunochemistry/transfusion medicine, microbiology, urine and body fluid analysis, and emerging diagnostics;

2. **RESPONSIVE LEADERSHIP**: Apply management concepts and leadership skills, taking responsibility for analysis and decision-making, and the effective communication of valid test information wherever laboratory testing is researched, developed or performed;

3. **INNOVATIVE PURPOSE**: Actively participate in the development, implementation, and evaluation of test systems and interpretive algorithms;

4. **PRACTICED SCHOLARSHIP**: Possess relevant experience in research design and practice.

5. **STRENGTH OF CHARACTER**: Demonstrate ethical and moral attitudes, principles of lawful conduct, and commitment to continuing professional development necessary for gaining and maintaining the confidence of patients, professional associates, and the community.

6. **HEURISTIC KNOWLEDGE**: Adhere to safety, governmental regulations and standards as applied to medical laboratory practice; and,

7. **NONPARTISAN DECORUM**: Project an image of professionalism, respecting the feelings and needs of others, protecting the confidence of patient information, and never allowing personal concerns and biases to interfere with the welfare of patients nor the work of colleagues and members of the healthcare team caring for patients.

---

*Modified to align with the NAACLS Standards for Accredited & Approved Programs, Unique Standards for MLS: “Description of the Medical Laboratory Scientist Profession” and “Curricular Requirements”, revised 11/2016.

Career Information

**What is a medical laboratory science professional?**

“Medical laboratory science professionals, often called medical laboratorians, are vital healthcare detectives, uncovering and providing laboratory information from laboratory analyses that assist physicians in patient diagnosis and treatment, as well as in disease monitoring or prevention (maintenance of health). We use sophisticated biomedical instrumentation and technology, computers, and methods requiring manual dexterity to perform laboratory testing on blood and body fluids. Laboratory testing encompasses such disciplines as clinical chemistry, hematology, immunology, immunohematology, microbiology, and molecular biology. Medical laboratory science professionals generate accurate laboratory data that are needed to aid in detecting cancer, heart attacks, diabetes, infectious mononucleosis, and identification of bacteria or viruses that cause infections, as well as in detecting drugs of abuse. In addition, we monitor testing quality and consult with other members of the healthcare team.

Medical laboratory scientists have an extensive theoretical knowledge base. Therefore they not only perform laboratory procedures including very sophisticated analyses, but also evaluate/interpret the results, integrate data, problem solve, consult, conduct research and develop new test methods.”

Learn More

How do I become a medical laboratory professional? (http://www.ascls.org/careers-ascls/how-do-i-become-a-laboratory-professional)

I Am a Medical Laboratory Scientist (https://www.youtube.com/watch?v=aU8vyqHCy5w&hd=1)

Employment of medical laboratory technologists is projected to grow 12 percent from 2016 to 2026, faster the average for all occupations. Employment of medical laboratory technicians is projected to grow 14 percent from 2016 to 2026, faster than the average for all occupations.
An increase in the aging population is expected to lead to a greater need to diagnose medical conditions, such as cancer or type 2 diabetes, through laboratory procedures. Prenatal testing for various types of genetic conditions also is increasingly common. Medical laboratory technologists and technicians will be in demand to use and maintain the equipment needed for diagnosis and treatment.

**Salary Range***

The median annual wage for medical laboratory scientists was $61,070 in May 2016. The lowest 10 percent earned less than $41,550, and the highest 10 percent earned more than $85,160.
