Program Description
The Department of Health & Human Performance (HHP) currently offers three academic programs, as well as a variety of activity courses for Fitness, Adventure, and Sport Skill Development.

Academic Offerings:
• Bachelor of Science degree in Exercises Science curriculum prepares student for specialized credentialing through organizations like the American College of Sports Medicine. Exercise Science students may also tailor their degree for graduate programs in various clinical/performance-related fields, as well as for post baccalaureate secondary teaching licensure in Physical Education.
• Bachelor of Science in Population Health allows students to specialize in one of two emphases either Health Care Administration or Public Health. Population health majors develop skills in improving the quality of patient care and community health through social policy, health promotion and disease prevention.
• Bachelor of Science in Recreation and Sport Management degree focuses on fostering healthy lifestyles, effective management of organizations, and the social and economic development of communities through recreation, tourism and sport services. Students can customize their expertise in any of three emphases either Sport Management, Corporate Recreation and Wellness, or Experience Industry Management. A general Recreation Management emphasis is also available as a Bachelor of Arts/Science Degree through Integrative Studies.

Activity Program:
The Physical Activity Program offers courses for the development of health-related physical fitness, outdoor adventure, and sport skill development.

• Examples of Health-related fitness courses include Weight Training, Swimming, Aerobic Dynamics, Water Aerobics, Kundalini & Vinyasa Yoga, etc. Students may also take a fitness course (“Fitness Center”) which allows for individualized workouts to better meet individual goals and busy schedules.
• Examples of Outdoor Adventure Classes include Rock Climbing, Mountain Biking, Outdoor Cooking, Backpacking, and SCUBA Diving. Various levels of these courses are taught to accommodate beginners as well as students with more advanced knowledge and abilities in various adventure pursuits.
• The Sport Skill Development curriculum includes courses designed for novice/beginning level students as well as courses for students with extensive backgrounds in particular sports. The course offerings range from traditional sports like Basketball, Volleyball, Tennis, Soccer, Golf, Softball, Racquetball, etc. to various forms of Martial Arts and competitive Triathlon Training. Increasing in popularity are the locally popular recreation and competitive sport activities like Badminton, Pington, and Pickleball.

Career Opportunities

A degree in exercise science can primarily lead to a career as a fitness trainer or instructor, or an athletic trainer. A fitness trainer or instructor leads, instructs, and motivates individuals or groups in exercise activities. A bachelor’s degree is not needed to become a fitness trainer or instructor; however, it does give an advantage. An athletic trainer specializes in preventing, diagnosing, and treating muscle and bone injuries and illnesses. A bachelor’s degree is the minimum requirement for this occupation.

Job Outlook

Employment of fitness trainers and instructors is projected to grow 8% over the 2014-2024 decade, about average for all occupations. On the other hand, employment of athletic trainers is expected to grow 21% in the same time span – much faster than average.

Salary Range

In May 2015, the median annual wage for fitness trainers and instructors was $36,160; the lowest 10% earned less than $18,690, and the highest 10 percent earned more than $70,180. For athletic trainers, the median annual wage was $44,670. The lowest 10 percent earned less than $28,480, and the highest 10 percent earned more than $68,300.
