Whether beginning your college education or looking to finish what you started, DSU Online provides a flexible path to help you reach your goals. A wide range of course options are available online, blended (mix of online and on campus), or in other digital formats.

**Flexible. Active. Real-world.**

Unlike most online classes, DSU’s online courses are designed to incorporate active learning, providing you an opportunity to actively apply what you learn to real-world challenges and tasks. These learning activities are available from anywhere, at anytime, allowing you the flexibility that life requires.

**Online Programs**

Beginning Fall 2018, complete online programs will also be available, allowing you to complete a certificate or degree without ever coming to campus. However, don’t let that keep you from stopping by.
