

# Laboratory Studies, AS

## Program Description

The Associate Degree in Laboratory Studies will train students in laboratory protocols and techniques and prepare them for jobs in clinical laboratory settings. It will give students exposure to coursework in biology, chemistry, and medical lab sciences. It is designed under the model of stackable credentials. Within the coursework, students can earn a Certificate of Medical Laboratory Assistant Technology that will serve as both an institutional as well as industry credential that would qualify students for jobs as a laboratory assistant. Certificate completion can occur in as little as two semesters. This stackable credential fits within the proposed associate degree. The associate degree itself would stack into any one of three existing bachelor's degrees, thus allowing a student to earn three awards during their undergraduate experience.

## Program Curriculum

**60 credits**

### DSU General Education Requirements

All DSU General Education requirements must be fulfilled. A previously earned degree may fulfill those requirements, but courses must be equivalent to DSU's minimum General Education standards in American Institutions, English, and Mathematics.

### Laboratory Sciences Degree Program Learning Outcomes (PLOs)

At the successful conclusion of this program, students will be able to:

1. Outline the foundational concepts of biology including cellular, organismic, ecological, and evolutionary biology.
2. Evaluate hypotheses, design research, test hypotheses, conduct data analysis, and draw conclusions on biology related problems.
3. Perform a full range of testing encompassing the pre-analytical, analytical, and post-analytical components of contemporary laboratory services.

4. Employ relevant experience in research design and practice.
5. Adhere to safety, governmental regulations and standards as applied to medical laboratory practice.
