Completion Requirements

- Complete requirements with a C grade or higher.

Certification

Upon successful completion, students are eligible to apply for testing and certification as an Emergency Medical Technician (EMT) through the National Registry of Emergency Medical Technicians.

Professional Licensure/Certification (PLC) Requirements

The curriculum for programs at Dixie State University customarily leading to licensure have been designed to meet the educational licensure/certification requirements in Utah as well as to prepare students to apply for licensure exams in the State of Utah. The licensure boards in each state are responsible for establishing the requirements for licensure/certification for their state. Requirement may vary state to state and may change at any time. Students who intend to use their DSU degree to secure licensure in any state other than Utah will need to review the professional licensure disclosures in that state pertaining to their program and consult with the state professional licensing board. For more information, visit the State Authorization and Professional Licensure (https://academics.dixie.edu/state-authorization/) web page and select your program, or speak to the director of your program.

EMT Certificate Program Learning Outcomes

At the successful conclusion of this program, students will be able to:

1. Demonstrate ability to perform an appropriate primary/initial assessment of the ill or injured patient in the prehospital setting.
2. Complete an appropriate secondary/focused history and physical exam in the pre-hospital setting.
3. Apply fundamental knowledge of general anatomy and physiology, scene information and patient assessment findings, and providing patient care based on those findings.
4. Apply fundamental knowledge of pharmacology as it applies to the scope of practice of an AEMT based on assessment findings, and appropriate treatment modalities.
5. Apply fundamental knowledge of the EMS system, safety/well-being of the EMT, medical, Legal, and ethical issues to the provision of emergency care.
