

Humanities, Philosophy, and Religious Studies - Philosophy Emphasis, BA

Program Description

Philosophy is a foundational discipline across Western and Eastern cultures and serves as a means to compare and engage multiple world perspectives. Philosophy allows students to explore issues of logic, knowledge, morals, beauty, history, identity, and meaning. Philosophy equips students with nuanced critical thinking and problem-solving skills, the ability to consider and evaluate multiple ethical and cultural perspectives, and complex communication skills. Overall, philosophy broadens and enriches all aspects of a person's intellectual life. It prepares students to be transdisciplinary thinkers, capable of engaging different professions and civic needs.

Similarly, studies in Humanities provide a diverse, multidisciplinary way of examining a complicated world. A degree in Humanities equips students with the means to analyze and critique the history of creative work and cultures. By focusing on constructs like the arts, architecture, philosophy, and religion, the humanities reveal the pluralities of the lived human experience. The diverse education of a humanities degree prepares students for a number of different graduate studies ranging from museum studies to linguistics.

The Philosophy and Humanities program at Utah Tech provides a unique, interdisciplinary learning opportunity. The major requires thirty-six total hours. The program is comprised of five elements: Introduction to the Disciplines, Foundational Courses, a Discipline Emphasis, Electives, and "Mortar" Interdisciplinary Courses. These courses will develop students' transdisciplinary reasoning skills, prepare students for immediate career goals, and ensure that students are competitive for both graduate study and future, long-term careers. Our students are taught how to engage abstract ideas and concepts, identify faulty reasoning, and express themselves clearly through multiple mediums. Philosophy majors have historically scored high on the GRE and LSAT scores but are also trained to evaluate these tests ethically and culturally. Our "Mortar" courses assist students in seeing how the skills acquired through their study of philosophy and humanities apply to disciplines ranging from health science to literature. The major will prepare students for a dynamic, changing, global work environment by training them to be careful, cross-cultural reasoners and communicators. Individuals graduating with philosophy and humanities degrees have become nationally recognized coaches, lawyers, artists, journalists, actors, and entrepreneurs.

BA Humanities, Philosophy, and Religious Studies

At the successful conclusion of this program, students will be able to:

1. Analyze concepts, definitions, arguments, and problems. This includes the ability to address questions of value and to extract essential material from complex information sets.
2. Synthesize a multitude of views and perspectives (including scientific, academic, and cultural) into a unified whole.

3. Construct systematic, persuasive arguments that are unambiguous and concise. These arguments will be expressed through writing, dialogue, and other communication methods. In constructing these arguments, students will be able to build and defend their own views, describe other positions, and provide good reasoning for why their conclusions are preferred.
