Nursing (Pre-Licensure), Bachelor of Science in Nursing (BS)

Nursing Program Learning Outcomes

At the successful conclusion of this program, students will be able to:

1. Analyze and evaluate data to demonstrate the ability to provide high quality direct and indirect care for patients across the lifespan and health illness continuum.
2. Integrate reliable evidence from multiple perspectives in order to demonstrate clinical reasoning.
3. Develop and maintain therapeutic interactions with a variety of clients and inter-professional team members to improve patient health outcomes.
4. Facilitate culturally sensitive holistic nursing care while protecting and promoting human dignity and diversity for a variety of populations.
5. Comply with legal and ethical standards of nursing practice through application of leadership, skills, and clinical judgment.
